Professional Summary

Results-driven NetSuite Developer and Software Engineer with strong expertise in JavaScript and SuiteScript (2.0/2.1). Experienced in developing, customizing, and integrating NetSuite solutions including Client Scripts, User Event Scripts, Suitelets, Map/Reduce, and Scheduled Scripts. Skilled in Advanced PDF/HTML Templates using FreeMarker, Saved Searches, machine-to-machine integrations, OAuth 1.0 and OAuth 2.0 authentication, and API testing using Postman. Focused on building scalable, high-performance solutions aligned with business requirements.

Education

Master of Science in Computer Science, COMSATS University Islamabad (LHR)
(2025 – Present)

Bachelor of Science in Computer Science, University of Management and Technology
(2020 – 2024)

Intermediate (ICS), KIPS College (2018 – 2020)

Professional Experience

MaxDot AI Solutions – NetSuite Developer February 2024 – Present

- Develop custom NetSuite solutions using SuiteScript 2.0/2.1 including Client, User Event, Suitelet, Scheduled, and Map/Reduce scripts
- Design and optimize Saved Searches, Custom Records, and Workflows to automate business processes
- Develop Advanced PDF/HTML Templates using FreeMarker for transactional documents
- Implement machine-to-machine integrations using REST APIs with OAuth 1.0 and OAuth 2.0 authentication
- Perform API testing and debugging using Postman
- Integrate third-party platforms including LibreChat with NetSuite
- Optimize script performance and ensure governance limits compliance

Software Alliance – Software Quality Assurance Engineer January 2023 – January 2024

- Execute functional and regression testing for web and mobile applications

- Create detailed test plans and test cases based on business requirements
- Track and manage defects using JIRA
- Validate bug fixes and perform retesting to maintain product reliability

Devsinc – Software Engineer Intern July 2022 – September 2022

- Worked with Ruby on Rails to develop web-based applications
- Collaborated with senior developers to implement backend features
- Improved problem-solving and software development practices in professional environment

Technical Skills

Programming: JavaScript

NetSuite: SuiteScript (Client, User Event, Suitelet, Scheduled, Map/Reduce), Saved Searches, Workflows, Custom Records

Templates: Advanced PDF/HTML Templates using FreeMarker

Integration: REST APIs, Machine-to-Machine Integration, OAuth 1.0, OAuth 2.0

Tools: Postman, JIRA, Git

Testing: Functional Testing, Regression Testing, Defect Lifecycle Management

Certifications

- Oracle NetSuite Certified AI Foundations Associate
- Oracle NetSuite Certified BI and Reporting Associate
- Oracle NetSuite Certified BI and Saved Searches Professional

Projects

Open Advisor to Share Business Ideas – Final Year Project

- Developed MERN stack web platform connecting entrepreneurs for networking and mentorship
- Built responsive front-end using Bootstrap
- Prepared detailed use cases and test cases documentation

RMINDER – Payroll and Tax Reminder App

- Performed cross-platform testing for iOS, Android, and Admin Panel
- Validated payroll module integration and deadline tracking functionality

Neoman – Media Publication Platform

- Tested content publishing workflows across mobile apps and admin panel
- Validated media playback, filtering, and category management features
